

# Hillview Nursery School

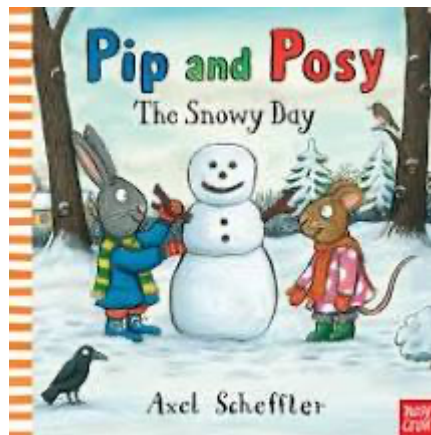

## Home Learning fun activities

### Week beginning: 18<sup>th</sup> January 2021

## Story

Can you click on Video Learning on our website to watch the story 'Pip and Posy' read by our team

## Physical Development

Make an ice cube painting by using ice cubes and paint. Sprinkle some paint onto small tray. Put one ice cube down and try to hold cube with large tweezers moving the paint around. Tweezers are a good way of developing your child's fine motor skills, which leading to writing skills.

## Communication and language (Understanding)

The story talks about feelings.

Talk to your child about their feelings. An example below:

During mealtime, talk to your child about a situation that makes you feel a particular **emotion** (such as happy, sad, frustrated, angry, jealous, etc.) Then ask your child to share the things that make them feel that same **emotion**. Add more complicated **emotion** words to daily talk as **children** start to understand the basic **emotions**.

## Personal, social and emotional development

Teach your child to use and care for the resources that they use and then begin to trust them to do so independently when they are confident to do so.

Encourage them to tidy up after themselves

## Mathematics

Sing counting songs and rhymes which help your child to develop the understanding of numbers such as 'five little monkeys' which they sing in nursery

## Understanding of the World

Do you know the different types of weather?  
What weather makes us hot?  
What makes us cold?  
What makes us wet?  
What can blow our hat away!
